

I would like to run for a third and final term as Graduate and Professional Allocations Committee. We have made significant changes this year, and I would like to make sure the changes are sustainable and can benefit both Graduate and Professional Student Government and all graduate and professional student groups in the years to come. We have done a lot with revising the funding tenets and increasing budget spending. The goal for next year would be to spend the entire or close to the entire GPAC budget. I'm also timely in working with the student group leaders and making good use of the GPAC members' time, especially since they have a lot to do with serving their respective student governments.
