I am interested in the role as Grants Director because I think it would allow me to contribute both my leadership skills, knowledge from being on the Grants Committee, and my desire to help students succeed into one position! I enjoyed working on the Grants Committee this year by reading and scoring applications. It really is an important part of GPSG as it allows students to share the incredible research they are doing here at Iowa on a larger scale or travel to network and improve their personal connections within their field. I pride myself on being organized and able to communicate with others successfully, so this role feels like a good fit for me.

Sincerely,

Lauren Lavin
