

Rank 1: I am interested in running for the Communications Director position. I have had experience running minutes before in my past summer administrative internship and currently am in CPHGSA as the communication director with current access to the CPH website. I am eager to engage in an active role in a student organization that captivates change in ways of improvement as we are all students with shared experiences. Being in a position that informs others within the student organization, including all other graduate professional students, establishes a greater need of transparency, which I appreciate and am willing to deliver.

Rank 2: I am interested in running for the Interprofessional Director position. I want to be a part of an indicative plan that captures graduate professional students' engagement and perspectives. I want to hear about the current and past Interprofessional committee plans so establish a baseline for improvement in engagement. This role is crucial for projecting the purpose of this student organization, which is to enact change and improve experiences with graduate professional students. This role can enhance the directed audience's experience and put it into motion to ensure a better overall experience for graduate professional students.
